-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the second gate member "formed on the same layer as the first gate member" is not clear. The claim doesn't say anything about forming the first gate member on a layer. The first gate member is "overlapping one of the first and the second semiconductor members," but the second gate member cannot be formed on either of the first or the second semiconductor members, because it is "not overlapping the first and the second semiconductor members." So what would the "same layer" be? The last two lines of the claim have the same problem. Here, the first connection is "formed on the same layer as the first data member," but the claim doesn't say anything at all about forming the first data member on a layer. There needs to be some sort of antecedent for "the same layer."

In claim 16, last three lines of the claim, "data members" is not clear. This could perhaps mean some sort of bus or conducting line for transmitting data, but then claim 19 states that the data members "include first and second voltage supply lines." Voltage supply lines are not data lines, they are power supply lines. So what is a "data member," as in claim 16?
